

Mediterranean Oak Borer

Learn about the biology, ecology, and best management practices of the recently detected exotic ambrosia beetle, Mediterranean oak borer (MOB; *Xyleborus monographus*), found in dead and declining valley oaks, blue oaks, and Oregon white oaks in Napa, Sonoma, Lake, and Sacramento Counties.

This workshop is intended for arborists and tree care professionals, but anyone interested in learning more about this pest is welcome to attend. This is a hybrid workshop.

ISA CEUs available.

Thursday, August 31st: 5:30-7:30 pm

Registration is free but required:

<https://ucanr.edu/mobworkshop>

In-person (Registration limited.)

UCCE Sonoma, 133 Aviation Blvd #109, Santa Rosa, CA 95403

Virtual

A Zoom link will be provided to registered virtual attendees.
